Education

Xiamen University (Top10 Recommended)

M.FIN. IN FINANCE

Xiamen, China

2022 – 2025

Southwestern University of Finance and Economics

B.A. / B.S. IN ECONOMICS

Chengdu, China

2018 – 2022

Research Interests

Core Research Interests: My research lies at the intersection of **world models**, **agent systems**, and **financial modeling**. I am particularly interested in building mechanism-aware computational frameworks that simulate complex environments and support reasoning, decision making, and strategy search, and plans to conduct research related to the construction of real-world models.

Research Experience

Financial World Model Project

PROJECT LEADER, PROF. LIANG HU'S LAB, TONGJI UNIVERSITY

Shanghai, China

Oct. 2025 – Present

- Proposed and led a financial world model project, designing the model framework and end-to-end research workflow.
- Integrated LLMs with world-model-based methods to tokenize real-world financial data and simulate complex financial dynamics.
- Applied multimodal methods to heterogeneous data and studied Transformer and RSSM architectures for system design.

Unlocking Inference Efficiency in Large Language Models: A Study of Speculative Decoding

RESEARCH ASSISTANT, PROF. TONG YANG'S LAB, PEKING UNIVERSITY

Beijing, China

Jul. 2024 – Oct. 2024

- Conducted research on speculative decoding and KV-cache optimization for efficient LLM inference.
- Analyzed multimodal model design and emerging methods such as Medusa and EAGLE.
- Contributed to TinyFormer by reproducing pretraining/finetuning pipelines and completing comparative experiments.

Advances in Financial Machine Learning

RESEARCH ASSISTANT, XIAMEN UNIVERSITY

Xiamen, China

Aug. 2023 – Oct. 2023

- Interpreted quantitative trading backtesting workflows and presented code and analysis using R Markdown.

Honors and Awards

2022 **Outstanding Graduate**, awarded upon graduation.
2021–2022 **Merit Student**, awarded for academic excellence and overall performance.
2019–2022 **Scholarship Recipient for Six Consecutive Semesters**, awarded continuously during undergraduate study.

Working Papers / Publications

- **Yanda Su.** “Financial World Models” Working paper. In preparation.

Skills

Research Areas: Financial modeling, world models, reinforcement learning, strategy search, complex systems

Programming: Python, R, MATLAB

Tools: PyTorch, Git, Overleaf, Vercel, Cloudflare

Miscellaneous

Languages: Chinese, English(fluently)

Interests: Video Production, Photography, Music, Reading
